This is the thread to post photos of your beloved South Bend lathes, show "before" and "after" photos and make our mouths water with the tooling and accessories you have accumulated for your machine. A lathe (/l e? ð /) is a machine that rotates a workpiece about an axis of rotation to perform various operations such as cutting, sanding, knurling, drilling, deformation, facing, and turning, with tools that are applied to the workpiece to create an object with symmetry about that axis. I think that would be the left hand rule. I have never seen a machine (lathe) where moving towards the spindle was a positive move. On a mill up is positive, and it would be a left hand rule.
