The leading coach and bus industry news source. Connecting you to the latest coach and bus market reports, features, comment and analysis. An elevator (US and Canada) or lift (Commonwealth countries) is a type of vertical transportation that moves people or goods between floors (levels, decks) of a building, vessel, or other structure. Elevators are typically powered by electric motors that either drive traction cables and counterweight systems like a hoist, or pump hydraulic fluid to raise a cylindrical piston like a jack.
